Object	Quantity	Description	Object	Quantity	Description
A	1	Inverter	J	1	WiFi/LAN/GPRS (Optional)
B	1	Bracket	K	1	Meter
C	12	PV connectors (Only for H3-Pro) (6*positive, 6*negative)	L	1	Hexagonal screw M4*16
D	12	PV pin contacts (Only for H3-Pro) (6*positive, 6*negative)	M	4	Battery connectors (2*positive, 2*negative)
E	1	AC connectors-EPS	N	4	Battery pin contacts (2*positive, 2*negative)
F	4	Expansion tubes & Expansion screws	O	1	Hexagonal screw M5*10 grounding screw
G	1	Earth terminal	P	1	COM1-12PIN
H	1	AC connectors-Grid	Q	1	COM2-24PIN
I	1	Quick installation guide	R	1	GRID Outer Snap Mechanical Lock

2. Installation Steps

Please make sure the inverter will be installed with a proper distance as shown below.

Step1: Choose the right location

500mm

500mm

500mm

500mm

500mm

Position	Min Distance
Left	500mm
Right	500mm
Top	500mm
Bottom	500mm

Step2: Mark the position

Installation position recommendation.
Use a spirit level to adjust the installation position.

500

500

500

1000

Arrow pointing up.

Step3: Drill the 6 holes with a φ8 drill bit.

Depth: at least 50mm Hammer the expansion tubes

Installing the Bracket Screw the expansion bolts

M6

9.0N.m

Step4: Match the inverter with bracket

Lock the screws on the side Make sure the inverter is firmly attached.

M5

1.0N.m

3. DC Connection

PV Connection

Choose 4mm² wire to connect the PV
Prepare AC wire as shown

6.0mm

4mm²

Strip length

PV+uses such terminals

D-

D+

Plug

Pin contact cable nut

BAT Connection

BAT cable is in the BMS package and is recommended.

Connect the BAT of the inverter and the battery port of the BMS with a power cable.

Communication with BMS, BMS communication line needs to be shorter than 10m Assemble the gland and screw the nut.

Min. operating voltage of the BAT is 120V.

Unlock the DC connector:

Use the specified wrench tool.

When separating the DC+ connector, push the tool down from the top.

When separating the DC- connector, push the tool down from the bottom.

Separate the connectors by hand.

Battery Wiring

Turn off the DC switch.

Choose 10mm² wire to connect the battery.

Trim 6mm of insulation from the wire end.

6.0mm

10mm²

Strip length

Separate the DC connector (battery) as below.

D-

D+

Plug

Pin contact cable nut

Insert striped cable into pin contact and ensure all conductor strands are captured in the pin contact.

Crimp pin contact by using a crimping plier. Put the pin contact with striped cable into the corresponding crimping pliers and crimp the contact.

Insert pin contact through the cable nut to assemble into back of the male or female plug. When you feel or hear a “click” the pin contact assembly is seated correctly.

Note:

BAT1+/-

BMS1

BAT2+/-

BMS2

Unlock the DC connector:

Use the specified wrench tool.

When separating the DC+ connector, push the tool down from the top.

When separating the DC- connector, push the tool down from the bottom.

Separate the connectors by hand.

AC Connection

Step1: Cable dimensions

Modell (kW)	10.0	12.0	15.0	20.0-22.0	24.9-25.0	29.9-30.0
Cable (ON-GRID)	6.0-10.0mm²	6.0-10.0mm²	6.0-10.0mm²	10.0-16.0mm²	10.0-16.0mm²	10.0-16.0mm²
Micro-Breaker	40A	40A	50A	63A	63A	80A
Modell (kW)	10.0	12.0	15.0	20.0-22.0	24.9-25.0	29.9-30.0
Cable (EPS)	6.0-10.0mm²	6.0-10.0mm²	6.0-10.0mm²	10mm²	10.0mm²	10.0mm²
Micro-Breaker	40A	40A	50A	63A	63A	80A

Step2: Prepare AC wire as shown in the picture

52.5mm

L1

L3

N

PE

12mm

55mm

L1/L2/L3: Brown/Red/Green or Yellow Wire
N: Blue/Black Wire
PE: Yellow & Green Wire
Note: Please refer to local cable type and color for actual installation.

A. EPS Connection

Disassemble the connector

Tighten the wire with a screwdriver, The torque of the crimp screw is 2.0±0.1N·m. Be sure to disconnect all power supplies before removing the protective end caps and wait 10 minutes before performing maintenance work.

Put the sealing body and yarn trapper into the main body, screw the lock nut into the main body, and the torque is (2.5 + / - 0.5N·m).

The female end of the wire is inserted into the male end of the line and accompanied by a click sound, and the installation is complete.

Use a screwdriver to align the unlock position and press and Hold the thread and pull it back to complete the separation of the male and female.

H3 PRO QUICK INSTALLATION GUIDE

B. GRID Wiring

Separate the ON-GRID plug into three parts as below.

Hold the middle part of the female insert, rotate the back shell to loosen it, and detach it from female inset.

Remove the cable nut (with rubber insert) from the back shell.

Slide the cable nut and then the back shell onto the cable.

Push the threaded sleeve into the socket, tighten up the cap on the terminal and the torque is (4-5N.m).

Push the threaded sleeve to connection terminal until both are locked tightly on the inverter.

Remove the GRID connector:Using the matching U-shaped unlocking tool, remove the external mechanical latch, swirl the swirl, and then pull it out.

Grounding Wiring

Trim 6mm of insulation from the wire end.

6.0mm

10mm²

Strip length

6.0mm

16mm²

Strip length

Insert striped cable into earth terminal and ensure all conductor strands are captured in the earth terminal.

Crimp earth terminal by using a crimping plier. Put the earth terminal with striped cable into the corresponding crimping pliers and crimp the contact.

Use the crimping pliers to press the ground cable into the ground terminal, screw the ground screw with screwdriver as shown below.

4. Serial Port Connections

Meter and RS485 should be connected to inverter by the connector illustrated in the figure below. All ports in connector should connect to the corresponding ports on inverter.

METER/CT/RS485 interface (20pin terminals)

1	2	3	4	5	6	7	8
DRY RLY2-	DRY RLY2+	DRY RLY1-	DRY RLY1+	/	/	Meter 485A	Meter 485B
9	10	11	12	13	14	15	16
GND TVS	GND COM	+12V SELV	RY Ctrl	/	/	/	/
17	18	19	20				
EMS 485A	EMS 485B	/	/				

Note: GND TVS, RY Ctrl, these wiring terminals are tested in the factory, please do not connect them.

COM interface (24pin terminals)

1	2	3	4	5	6	7	8
/	RYL_L-	RYL_L+	RYL_G-	RYL_G+	ARM 485B	ARM 485A	GND COM
9	10	11	12	13	14	15	16
E STOP	/	/	VCC	DRM1	DRM2	DRM3	DRM4
17	18	19	20				
DRM0	GND COM	GND COM	/				

Note: ARM 485A, ARM 485B, GND COM, VCC these wiring terminals are tested in the factory, please do not connect them.

Parallel1 (24pin terminals)

1	2	3	4	5	6	7	8
CAN H1	CAN L1	WiFi 485A	WiFi 485B	485A	485B	GND COM	/

Parallel2 (24pin terminals)

1	2	3	4	5	6	7	8
CAN H1	CAN L1	WiFi 485A	WiFi 485B	485A	485B	GND COM	/

Note:

Compatible Meter type: DTSU666 (CHINT).

For other pin definitions, please refer to the user manual.

Communication A and B are marked on the side of the meter;

Legend:

GRID L1

GRID L2

GRID L3

GRID N

PE

SHADA

SHADA

5. Inverter Start-Up

Please refer to the following steps to start up the inverter.

Ensure the inverter fixed well.

Make sure all wirings are completed.

Make sure the meter is connected well.

Make sure the battery is connected well.

Make sure the AC-EPS contactor is connected well (if needed).

Make sure the BMS buttons and battery switch are off.

Turn on the PV/DC switch (for Hybrid version only), AC-GRID breaker, EPS breaker and battery breaker.

If the main page shows “switch off”, please long press “v” bottom to quickly go to the START/STOP page and set it to start.
(Enter the settings page, default password is '0000').

Note:

Add boot-up guide interface, the first boot-up need to select the safety regulations and set the time.

Set the time on the inverter using the button or by using the APP.

6. Inverter Switch Off

Please refer to the following steps to switch off the inverter.

Enter the settings page, select START / STOP and set it to stop.

Turn off the PV/DC switch (for Hybrid version only), AC breaker, EPS breaker and battery breaker.

Wait 5 min before you open the upper lid (if in need of repair).

Note:

The inverter installation in complete. For battery installation, please refer to battery quick installation guide.
