

HV-junction box-50 Quick Installaton Guide

1. Tools Required

2. Packing List

3. Overview

4. Preparation

- Please avoid direct sunlight, rain exposure and snow build-up during installation and operation.
- To avoid overheating, always make sure the air flow around the box is not blocked.
- Do not install in places where gas or flammable substances may be present.
- Avoid electromagnetic interference that can compromise the correct operation of electronic equipment.
- The slope of the wall should be within $\pm 5^\circ$.
- Reserve more than 300mm of space around the junction box.

5. Installation Steps

STEP-1:
Choose the place you want to install the junction box. Place the junction box on the wall a of the 4 holes of fixing blocks.

STEP-2:
Drill holes with hammer drill, make sure the holes are at least 45mm deep, and then tighten the expansion tubes.

STEP-3:
Insert expansion tubes into the holes and tighten them. Install the fixing blocks with expansion screws.

6. Wiring Steps

Note: Power cable must be pulled straight from the box for more than 80mm before bending.

STEP-1:
Connect the cable(D2) from the junction box to the ground.

STEP-2:
Connect the power cable(included in the battery package list) from the battery to the junction box.

STEP-3:
Connect the power cable(E2) from the junction box to PCS.
