Sparkies

- are you installing home battery storage systems yet?

If not, you're missing a trick.

The energy storage industry is absolutely massive right now, and it's only getting bigger.

Your average Polar ESS project is anywhere from £5-£10k, and you can be done inside a day.

Plus, we make it really straightforward for you to just crack on.

Let's tell you a bit about who you'll be working with.

We're Polar ESS, and we're the affordable energy storage people.

We don't think it's right that so many billpayers are priced out of the benefits of battery storage.

There's a climate crisis AND a cost of living crisis, for crying out loud.

So, we've formed Polar ESS as a scrappy challenger brand.

And, most important of all, we've got a great new product that we're selling for an amazing price.

Feast your eyes

on these beauties.

Affordable, yes. Reliable, yes. An absolute champ of a product? Also yes.

Available in:
3.6kW
/ 6.0kW

Your installations will be *easy peasy.*

Our energy storage systems are that easy to fit that you don't need any extra training to install them.

As long as you're:

- A fully qualified sparky
- Comfortable fitting energy storage systems
- Equipped with our installation guides

You're good to go. Seriously. That's it. They are **THAT** easy.

Plus, we're really easy to work with.

Low-cost products
coming in at half
the big brand price

Friendly, clued up,
and headquartered
in the Midlands

All our own
factories, all our
own products

Properly committed
